

PSYCHOLOGY

Subject Vision

Our curriculum exposes students to a wide range of theories and research that will empower them with knowledge and insight into the influences and motivations behind human behaviour. Students will develop research skills and reflect on how psychologists study behaviour in a scientific manner, whilst at the same time, recognising and understanding our individual differences.

Aims:

- develop essential knowledge and understanding of different areas of the subject and how they relate to each other
- develop and demonstrate a deep appreciation of the skills, knowledge and understanding of scientific methods
- develop competence and confidence in a variety of practical, mathematical and problem-solving skills
- develop student's interest in and enthusiasm for the subject, including developing an interest in further study and careers associated with the subject
- understand how society makes decisions about scientific issues and how the sciences contribute to the success of the economy and society
